Available for Internships & Research

MD IFTIUR HOSSEN RIYAD

Founder & CEO @ **MyGenie** · Cyber Security Engineering Student · Security Researcher & Tech Innovator

`Engineering Secure Digital Ecosystems, AI Assistants, Incident Response & OffSec Systems`

Gazipur, Dhaka, Bangladesh

---

01 — ABOUT

Personal Profile

I am a dedicated **Cyber Security Engineering undergraduate** at the University of Frontier Technology, Bangladesh (UFTB), driven by a deep commitment to building secure, resilient, and human-centric technology ecosystems.

As the **Founder & CEO of MyGenie**, I merge security architecture with artificial intelligence to solve real-world accessibility and automation challenges for businesses and individuals across South Asia.

Focus

Security-by-Design & Zero Trust Architecture

Location

Gazipur, Dhaka, Bangladesh

Education

B.Sc. Cyber Security Engineering, UFTB

My journey spans offensive and defensive security research, full-stack application development, and technical leadership. Beyond engineering intrusion detection systems, threat-monitoring platforms, and AI knowledge tools, I hold a strong passion for **creative literature** — actively writing contemporary Bengali poetry, recording travel narratives, and researching the socio-political history of the Indian Subcontinent.

THREE LENSES ON MY WORK

01 / SECURE ↗

Security through practice

Explore the tools, lab, and security work behind the projects.

02 / BUILD ↗

Products with purpose

See prototypes, project evidence, and the MyGenie story.

03 / WRITE ↗

Ideas in Bengali

Read Bengali poetry, creative writing, and technical notes.

---

02 — SKILLS

Technical Skills & Tooling Matrix

Programming Languages

C · C++ · Java · Python · PHP · JavaScript

Web & App Engineering

HTML5 · CSS3 · Bootstrap · PHP · MySQL · XAMPP · FastAPI · REST APIs

Security & Auditing Tools

Nmap · Lynis · Nikto · tcpdump · Wireshark · Kali Linux

AI & Systems Architecture

RAG · Chroma Vector DB · scikit-learn · Multi-Agent Orchestration

Core Security Concepts

GRC · IDS · RBAC · Cryptography · Log Analysis · Audit Logging

Compliance Frameworks

ISO 27001 · NIST SP 800-53 · Bangladesh PDPA 2026

Languages

Bengali (Native) · English (Working Proficiency)

Skills in Practice

Rather than self-rated percentages, explore the public project repositories, course certificates, and technical articles listed here. These show work and learning—not a standardized proficiency rating.

Public project repositories

8 repositories linked

- Portfolio Website
- MyGenie
- EduQuiz
- ThreatGuard
- SecureAudit

Course certificates

29 certificates listed

Read technical articles →

Security Lab & Practice Environment

Operating systems

Kali Linux · Ubuntu Server · Windows 11 Pro

Project infrastructure

C++ and Java security projects · SQLite log storage · Virtualized lab environments

Tools used in projects

Nmap · Lynis · Nikto · tcpdump · Wireshark

Practice areas

Network and system assessment · IDS and log analysis · Secure design · Incident-response learning

---

Testing scope

Practice is limited to systems I own, isolated lab environments, or programs where testing is explicitly authorized.

03 — PROJECTS

Featured Projects & Prototypes

Active prototypes, system proposals, and classic engineering repositories.

PROTOTYPE

APON

Project Lead & Architect

A phased proposal for a trusted digital ecosystem with one verified identity across commerce, local services, student opportunities, communities, and agriculture, supported by shared security and an AI coordination layer.

- Trusted Digital Identity
- AponBazar: trusted product listings and orders
- AponServices: local and professional services
- Student, community, and agriculture pillars
- Master APON AI
- Multi-Agent Orchestration

AI · Security · Ecosystem

▶ **Read proposal-based case study**

Phased proposal: secure core, AponBazar, AponServices, and administration first; additional pillars follow validation.

PROTOTYPE

CampusNet

Project Lead / Security Engineer

A proposed university-verified collaboration network for students, teachers, staff, and researchers to discover peers, form teams, share opportunities, and work across campuses with privacy and security controls.

- Identity Verification
- University email, ID review, and appeals
- Privacy Matrices
- Cross-campus research and team matching
- CTF/Hackathon Hub
- Encrypted File Sharing

Security-First · Networking

▶ **Read proposal-based case study**

WORKING PROTOTYPE

IR Prohori

Team Coordinator, AI & Product Lead

A youth digital-safety initiative combining a Bangla/English RAG assistant grounded in verified guidance with practical helplines, campus resources, workshops, and peer ambassadors.

- RAG Bilingual AI
- Answers grounded in retrieved sources; abstains when unsupported
- Verified Cyber Laws
- Helpline directory and shareable safety toolkit
- Campus Ambassadors

RAG · AI · Social Impact

▸ **Read proposal-based case study**

DKC Digital Respect & Cohesion Fellowship 2026 (UNDP & SURGE Bangladesh); proposal target: reach 500+ young people in the first three months.

View Repository →

WORKING PROTOTYPE

NOJORGHOR

Team Leader & Backend/Detection Lead

A proposed Windows/Linux endpoint monitoring platform for resource-limited institutions. It combines real event collection, rule and anomaly detection, and plain-Bangla explanations; effectiveness and resource use are to be measured in an isolated lab.

- Windows and Linux event agents
- Rule-based Detection
- Isolation Forest ML
- Bengali Alert Explanations
- Risk scoring and MITRE ATT&CK context
- Guarded Blocking

scikit-learn · IDS · ML

▸ **Read proposal-based case study**

Ziaur Rahman Foundation Science Fair 2026

PRE-SEED PROPOSAL

SURAKSHA

Founder & Product/Deployment Lead

A proposal-stage, privacy-conscious emergency coordination platform that moves from SOS and consent-based location sharing through verification, responder assignment, status updates, and case closure.

- One-Tap SOS
- Consent-based location and trusted contacts
- Verified → Assigned → Responding → Closed
- Authorized responder triage and assignment
- Role-based access and privacy safeguards
- Audit Logging

Emergency | Privacy | Tracking

▶ **Read proposal-based case study**

Pre-seed proposal; field pilot planned. The proposal does not claim field users, revenue, or signed institutions.

Classic Engineering Projects & Repositories

ThreatGuard

`Intrusion Detection & Authentication System`

High-performance, lightweight IDS architecture with secure authentication and minimal system overhead.

C++ · Cryptography · OOP

Collaborator: Momtasin Tamanna (2404012) · Abstract submitted to ICCDRM 2026, University of Dhaka

View Repository →

SecureAudit

`GRC Toolkit for Kali Linux`

Multi-tool compliance auditing for Linux environments integrated into a single automated dynamic risk matrix. Integrates Nmap, Lynis, Nikto, and tcpdump with SQLite logging and HTML dashboard export.

Java · SQLite · Nmap · Lynis · Nikto

Course SEC 115 · Team: Atiqur Rahman (2404029), Md. Eyasin (2404032)

View Repository →

Buy & Sell Platform

`E-Commerce DSA Application`

Full-featured console e-commerce system with Admin/User portals, custom search (Linear/Binary), sorting (Quick, Bubble, Selection, Insertion), and a Recycle Bin — built purely on custom Data Structures.

C++ · OOP · File I/O · DSA

Collaborator: Milton Roy (2404001)

View Repository →

EduQuiz

`Full-Stack E-Learning Platform (In Progress)`

Web and Android platform for real-time quiz creation, automated scoring, and student progress tracking in a unified portal.

PHP · MySQL · Bootstrap · Java/Kotlin

Course PROG 212 · Team: Md. Eyasin (2404032)

View Repository →

04 — STARTUP

MyGenie

Intelligent AI-Powered Personal & Business Assistant

Founder & CEO / Product & Security Lead

To empower South Asian small businesses and individuals with a **secure, Bangla-first AI assistant** that bridges automated customer engagement with privacy-conscious workforce management.

MyGenie application screenshots from Project SS.docx.

▸ **Read proposal-based case study**

Visit MyGenie website → **View Repository →**

Co-Founders

- Md Eyasin — CTO
- Md Zahed Hossen — COO

Institution

Department of Cyber Security Engineering, UFTB

Overview

Bilingual AI assistant with workspace isolation, grounded business knowledge, multi-channel messaging (WhatsApp, Messenger, Email), and seamless human staff handoff.

Key Responsibilities

Product vision, security architecture, RBAC, workspace isolation, prompt grounding, and MVP deployment.

Proposed MVP Workflows

Bilingual AI chat, approved business knowledge, personal productivity, orders and bookings, human handoff, and an administrative dashboard.

Trust & Action Controls

Separate workspaces and role permissions; confirm consequential actions and hand off uncertain or sensitive conversations to a person.

MVP Roadmap

The proposal targets a 12-week MVP. Voice features and broader messaging coverage are planned after core workflows are validated in pilots.

05 — RESEARCH

Research & Academic Publications

Research exploring cybersecurity systems and the history of the Indian Subcontinent.

UNDER PEER REVIEW

ThreatGuard — Intrusion Detection & Authentication System Architecture

ICCDRM 2026 · University of Dhaka

Domain: Cryptography · Network Security · Intrusion Detection Systems

Abstract submitted and under peer review for presentation/publication.

INDEPENDENT

Historical Research — Indian Subcontinent

Focus: Socio-political narratives, historical analysis, and archival history of the Indian Subcontinent.

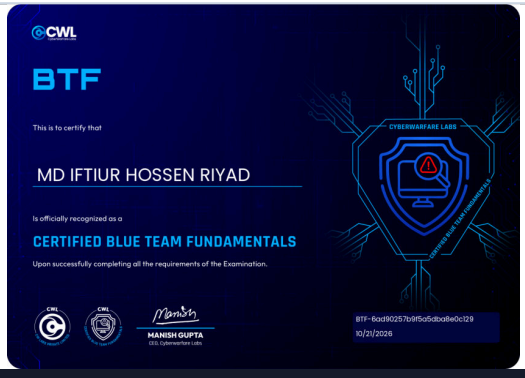

06 — CERTIFICATIONS

07 — ACHIEVEMENTS

Competitions, Fellowships & Leadership

FELLOWSHIP 2026

DKC Digital Respect & Cohesion Fellowship

UNDP & SURGE Bangladesh

Team Coordinator for Team Prohori presenting **IR Prohori**. 8-month fellowship program with BDT 50,000 seed grant.

SCIENCE FAIR 2026

Ziaur Rahman Foundation Science Fair

"In Search of Future Scientists 2026"

Team Leader presenting **NOJORGHOR** Threat Detection and Response Platform.

ACADEMIC

University Academic Competitions

UFTB

Active participant in C++ DSA coding showcases, security audit hackathons, and software engineering exhibitions.

Leadership & Extra-Curricular

Founder & CEO @ MyGenie

Leading product architecture, business model execution, and technical vision.

Team Leader / Project Coordinator

Guiding multi-member engineering teams — Team Prohori, Team Nojiorghor, Team Suraksha.

Peer Mentorship

Assisting junior students at UFTB in Cyber Security fundamentals, Linux, C++ OOP, and DSA.

CAREER ROADMAP

Career Roadmap: 2026–2030

A flexible set of career goals for 2026–2030; timing may change with study progress and opportunities.

2026

CURRENT

Continue studies and build practical foundations

Continue the Cyber Security Engineering degree at UFTB and strengthen practical skills through documented portfolio projects.

2027

Prepare for supervised security experience

Build core skills and seek an internship or mentored experience; practice security testing only in authorized labs and programs.

2028

Deepen a focused area of practice

Develop further in areas such as threat detection, incident response, or secure AI, and document project results and lessons.

2029

Work toward expected degree completion

Work toward the currently expected June 2029 graduation and explore suitable entry-level opportunities in security engineering or related fields.

2030

Grow through early-career engineering work

Aim to contribute to secure, reliable systems through an early-career role or equivalent experience, while continuing to learn and validate product ideas with users.

08 — TERMINAL

Interactive CLI Mode

Query portfolio information using shell commands. Type `help` to begin.

09 — CREATIVE WORK

Poetry, Travel, Reading & Blog

Bengali Poetry

I write Bengali poems about reflection, everyday experiences, and human emotion.

Travel Notes

A personal interest in noting places, people, and everyday cultural observations from Bangladesh.

Historical Interests

Personal reading and notes on the social and political history of the Indian subcontinent.

Blog & Creative Writing

Explore my Bengali poetry, creative writing, and technical articles in one place.

Explore the blog →

10 — EDUCATION

Academic Education

Expected Graduation: June 2029

B.Sc. in Cyber Security Engineering

University of Frontier Technology, Bangladesh (UFTB)

Level 2, Term 1 · Student ID: 2404011

Higher Secondary Certificate

HSC — GPA 4.58 / 5.00

Mymensingh Board

Secondary School Certificate

SSC — GPA 5.00 / 5.00

Mymensingh Board

PROJECT AREAS

Security & Engineering Focus

Areas explored through the student projects and proposals shown here—not a commercial service menu.

Security testing discussed or demonstrated in portfolio projects is limited to authorized systems and lab environments.

Intrusion Detection & Monitoring

Security monitoring concepts explored through the ThreatGuard project and related study.

- C++ IDS architecture and event visibility
- Signature and anomaly detection concepts
- Readable alerts for authorized lab review

See related project →

Security Audit Tooling

Course project work combining established Linux security tools into a reviewable workflow.

- Nmap, Lynis, and Nikto integration
- SQLite-backed assessment records
- Risk summaries and HTML reporting

See related project →

Grounded AI & Cyber Safety

IR Prohori explores bilingual cyber-safety guidance grounded in reviewed reference material.

- Retrieval-augmented answer design
- Source-aware content and maintenance
- Bengali and English user experience

See related project →

Secure Product & AI Design

MyGenie project work explores a Bangla-first assistant with privacy-aware workflows.

- Role-based and isolated workspaces
- Human handoff for sensitive actions
- Product concepts and working demo

See related project →

RESOURCES

Free Resources

A practical bilingual guide, personal course notes, and links to trusted security resources.

FEATURED

Bilingual Cyber Safety Checklist

A practical English and Bangla guide to stronger accounts, safer devices, backups, and recovery after an account incident.
