PROFESSIONAL SUMMARY

I am a dedicated Cyber Security Engineering undergraduate at the University of Frontier Technology, Bangladesh (UFTB), driven by a deep commitment to building secure, resilient, and human-centric technology ecosystems. As the Founder & CEO of MyGenie, I merge security architecture with artificial intelligence to solve real-world accessibility and automation challenges for businesses and individuals across South Asia.

EDUCATION

University of Frontier Technology, Bangladesh (UFTB)
B.Sc. in Cyber Security Engineering - Level 2, Term 1 | Expected Graduation: June 2029

Mymensingh Board
HSC - GPA 4.58 / 5.00 | Higher Secondary Certificate

Mymensingh Board
SSC - GPA 5.00 / 5.00 | Secondary School Certificate

TECHNICAL SKILLS

Programming Languages: C, C++, Java, Python, PHP, JavaScript

Web & App Engineering: HTML5, CSS3, Bootstrap, PHP, MySQL, XAMPP, FastAPI, REST APIs

Security & Auditing Tools: Nmap, Lynis, Nikto, tcpdump, Wireshark, Kali Linux

AI & Systems Architecture: RAG, Chroma Vector DB, scikit-learn, Multi-Agent Orchestration

Core Security Concepts: GRC, IDS, RBAC, Cryptography, Log Analysis, Audit Logging

Compliance Frameworks: ISO 27001, NIST SP 800-53, Bangladesh PDPA 2026

Languages: Bengali (Native), English (Working Proficiency)

STARTUP & LEADERSHIP

MyGenie - Founder & CEO @ MyGenie , Cyber Security Engineering Student , Security Researcher & Tech Innovator

Co-founders: Md Eyasin - CTO Md Zahed Hossen - COO

• Bilingual AI assistant with workspace isolation, grounded business knowledge, multi-channel messaging (WhatsApp, Messenger, Email), and seamless human staff handoff.

Founder & CEO @ MyGenie Leading product architecture, business model execution, and technical vision.

Team Leader / Project Coordinator Guiding multi-member engineering teams - Team Prohori, Team Nojiorghor, Team Suraksha.

Peer Mentorship Assisting junior students at UFTB in Cyber Security fundamentals, Linux, C++ OOP, and DSA.

FEATURED PROJECTS

NOJORGHOR - Team Leader & Backend/Detection Lead
Ziaur Rahman Foundation Science Fair 2026
• A proposed Windows/Linux endpoint monitoring platform for resource-limited institutions. It combines real event collection, rule and anomaly detection, and plain-Bangla explanations; effectiveness and resource use are to be measured in an isolated lab.

IR Prohori - Team Coordinator, AI & Product Lead GitHub
DKC Digital Respect & Cohesion Fellowship 2026 (UNDP & SURGE Bangladesh); proposal target: reach 500+ young people in the first three months.
• A youth digital-safety initiative combining a Bangla/English RAG assistant grounded in verified guidance with practical helplines, campus resources, workshops, and peer ambassadors.

ThreatGuard - Intrusion Detection & Authentication System GitHub
Collaborator: Momtasin Tamanna (2404012) , Abstract submitted to ICCDRM 2026, University of Dhaka
• High-performance, lightweight IDS architecture with secure authentication and minimal system overhead.

SecureAudit - GRC Toolkit for Kali Linux GitHub
Course SEC 115 , Team: Atiqur Rahman (2404029), Md. Eyasin (2404032)
• Multi-tool compliance auditing for Linux environments integrated into a single automated dynamic risk matrix. Integrates Nmap, Lynis, Nikto, and tcpdump with SQLite logging and HTML dashboard export.

CampusNet - Project Lead / Security Engineer
• A proposed university-verified collaboration network for students, teachers, staff, and researchers to discover peers, form teams, share opportunities, and work across campuses with privacy and security controls.

SURAKSHA - Founder & Product/Deployment Lead
Pre-seed proposal; field pilot planned. The proposal does not claim field users, revenue, or signed institutions.
• A proposal-stage, privacy-conscious emergency coordination platform that moves from SOS and consent-based location sharing through verification, responder assignment, status updates, and case closure.

APON - Project Lead & Architect
Phased proposal: secure core, AponBazar, AponServices, and administration first; additional pillars follow validation.
- A phased proposal for a trusted digital ecosystem with one verified identity across commerce, local services, student opportunities, communities, and agriculture, supported by shared security and an AI coordination layer.

Buy & Sell Platform - E-Commerce DSA Application GitHub
Collaborator: Milton Roy (2404001)
- Full-featured console e-commerce system with Admin/User portals, custom search (Linear/Binary), sorting (Quick, Bubble, Selection, Insertion), and a Recycle Bin - built purely on custom Data Structures.

EduQuiz - Full-Stack E-Learning Platform (In Progress) GitHub
Course PROG 212 , Team: Md. Eyasin (2404032)
- Web and Android platform for real-time quiz creation, automated scoring, and student progress tracking in a unified portal.

COMPETITIONS & FELLOWSHIPS

DKC Digital Respect & Cohesion Fellowship (UNDP & SURGE Bangladesh) - Team Coordinator for Team Prohori presenting IR Prohori. 8-month fellowship program with BDT 50,000 seed grant.

Ziaur Rahman Foundation Science Fair ("In Search of Future Scientists 2026") - Team Leader presenting NOJORGHOR Threat Detection and Response Platform.

University Academic Competitions (UFTB) - Active participant in C++ DSA coding showcases, security audit hackathons, and software engineering exhibitions.

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- **AV/EDR Evasion Practical Techniques** - Red Team Leaders, August 9, 2026
